**Message:** Your site says nothing about pentobarbital. Do you compound it for the state of Missouri's department of corrections, as has been publicly alleged in an AP story that ran this morning, and if so, now that that story has gone public, do you think that is prudent? Seems to me that manufacturing a drug expressly to kill people flies in the face of one of those commandments Moses got from Jehovah on Sinai, but maybe I'm just being old-fashioned. Still, were I you I'd at least want to beef up my security now that you've been put in the spotlight as a likely supplier and failed to issue a flat denial. As the folks at the federal building can tell you, it only takes one fanatic with a truckload of fertilizer to make a real dent in business as usual. In your place, I'd either swear to the nation that my company didn't make execution drugs of ANY sort, and then make dang sure that's true, or else openly accept the burden of putting my employees and myself at unacceptable (and possibly uninsurable) risk. Just sayin'.
